

LET'S TALK MOM TO MOM

As moms we care deeply about protecting the health of our children and grandchildren. It's our job to stand up for our children.

Harmful pollution, climate change and toxic chemicals are putting our precious children at risk. It doesn't have to be this way. On election day your vote can elect candidates who care about these issues. Please vote as if your child's health depends on it. **Because it does.**

CLEAN AIR
moms
ACTION

Here's why:

CLEAN AIR

Air pollution from fossil fuels leads to bad air quality in too many communities. Increases in smog can trigger asthma attacks and exacerbate other chronic health problems.

Do not let your child's health be voted away to protect polluters' profits. Instead, VOTE to protect little lungs from toxic air pollution.

CLIMATE CHANGE

The same harmful pollution that is making our children sick is causing rising temperatures and extreme weather events. Our changing climate is making smog worse. It increases respiratory health threats, particularly for people with allergies and asthma. Also intense heat waves exacerbate heart and lung conditions.

VOTE for candidates who support proposals to cut methane emissions from the oil and gas industry. And vote to put our country on a clean energy path while protecting American jobs!

TOXIC CHEMICALS

Dangerous chemicals are found in our daily lives. They often enter our homes and bodies without our realizing it. In fact, these chemicals may not even have been disclosed, identified or studied. Thousands of toxic chemicals found in everyday products are linked to potential reproductive and developmental toxicity, endocrine disruption, birth defects, cancer, asthma, headaches and skin irritants. Children are among the most vulnerable to such chemicals.

Will you vote to put the health and well-being of your family first?

*Please **promise** to protect our children from air pollution, climate change and toxic chemicals.*

Remember, it doesn't have to be this way.

Get Involved

Help make the voice of moms and our children heard during this election:

VOLUNTEER

We need passionate volunteers to help get their communities out to vote this November 8th. You can make a difference by knocking on doors to talk mom to mom, educating your community on the issues, making phone calls to encourage other moms to vote, and showing up at candidate events.

VOTE

There is more on the line this during the 2016 election than the office of President. There are also many other critical races that will have more of an impact on your daily life and the quality of the air our children breathe.

INTERACT

Become a member of Clean Air Moms Action and join us in conversation online. You will inspire others to help elect officials who care about protecting little lungs from air pollution and want to deal with climate disruption. Also, join our selfie campaign online and tell us what you love most!
